# Granger-Hunter Improvement District Hazard Mitigation Plan Public Involvement & Stakeholder Meeting

- Better understanding of operational dependence on critical infrastructure
- A chance to build relationships that can reduce the impact of hazards on your operations and speed recovery following a disaster
- An opportunity to jointly identify investment priorities to reduce risk to the community
- Your input will be important in identifying resilience solutions that are most effective at reducing risk, are of greater benefit to the region as a whole, and lead to an efficient use of mitigation resources
- This planning effort has the potential to provide resilience to your operations by improving critical infrastructure resiliency throughout the region
- We need your participation to improve the resilience of our region, of which you play an important part
